

Please remember that the deadline for SWAC swimmers to register for the PVAC invitational is this Friday, October 9th. Online registration and payment are due by that date.

Please refer to the deadline notice below for general information regarding SWAC deadlines for meets, invitationals, apparel sale, etc.

SWAC Deadline Notice

To: All SWAC Members and Parents

Subject: SWAC Deadline Policy

Please be aware that throughout the season there are many deadlines which must be observed. We have deadlines for dual meet sign-up, invitational meet sign-up, apparel sales, etc.

Each deadline is set based on time needed by our volunteers and/or coaches to work with vendors, league teams, and other organizations to accomplish their various tasks. The volunteers must work within the confines of external parameters and timetables such as host team deadlines for invitationals and production time needed by vendors.

Please respect our volunteers by not asking them to extend deadlines or to make changes (including cancellation) to your information after a deadline has passed. We understand that plans change, however, once deadlines have passed additions, changes, and deletions cause our volunteers significant additional effort and time and may result in delays in our orders for the whole team or our team not meeting other external deadlines such as host team registration dates for invitationals. If your plans change **BEFORE** the SWAC deadline, please contact the appropriate volunteer immediately to make a change.

An additional note: Signing up online for an invitational constitutes a promise to pay the related meet fees whether your child swims in the meet or not. While our intention is to not register any swimmer without payment, occasionally circumstances require us to send registration to the host team before we have all of the payments in hand. Once the SWAC sign-up deadline passes, if we have not received a contact from you, it is assumed that your swimmer is planning to attend the meet and payment is required without exception.
